**For Immediate Release**

**MINNEAPOLIS** - Quality Tech Services, Inc. (QTS), a medical device packaging and assembly firm has expanded their package design and package sealing capabilities. They have hired additional package design engineers and have added new double shuttle tray sealers. The engineers work primarily to translate medical device descriptions and specifications into package designs, while the new double shuttle tray sealers can seal trays as large as 14-by-19 inches and 8 inches deep to 1.5-by-3.5 inches. "The decision to increase our package sealing and package design capacity will allow QTS to continue to grow with the medical device industry," said Doug Wilder QTS President/CEO.

QTS specializes in Class 7 clean room assembly, packaging, and sterilization for medical devices. The company is privately-held and headquartered in Bloomington, MN. QTS is ISO certified to 13485: 2003 and FDA compliant. For more information please visit [www.qtspackage.com](http://www.qtspackage.com).
